Cocoa Powder Coarse Crushers	BWN200	BWN300
Capacity /h	10-120 kg	30-200 kg
Fineness	10-120 mesh	10-120 mesh
Power	2,2 kWh	5,5 kWh
Dimension mm	480*520*1040	750*600*1260
Weight	75 kg	180 kg
Warranty	1 year	1 year
EXW price	EUR 2,770	Quote

Sieve Mesh 30-150 to be determined at order

The machine makes use of high speed rotation between the motive teeth disc and the fixed teeth disc. Finished powder directly discharges through the outlet from the grinding cavity collected by cloth bag where air will be gone out under pressure through small pore and fine powder won't be brought out, thereby nothing is in waste and in pollution. The size of granularity is based on sieve meshes. The whole machine is made of stainless steel. The teeth grooves in the grinding cavity are designed by precise mechanical equipment. The surface of teeth is smooth and cleaned easily.
